EDUCATION

- National Institute of Technology, Kurukshetra** 2027
B.Tech in Electrical Engineering
- RBSE Board (Senior Secondary)** 2022
Class 12th Percentage: 81%
- HBSE Board (Secondary)** 2020
Class 10th Percentage: 92%

PROJECTS

- Banking Management System (OOP-Based)** Jan 2026 – Feb 2026
C++, Object-Oriented Programming, File Handling
 - Developed a console-based banking system implementing core OOP principles like encapsulation, inheritance, and polymorphism.
 - Designed functionalities for account creation, deposit, withdrawal, balance inquiry, and transaction history management.
 - Implemented file handling to store and retrieve customer data, ensuring data persistence across sessions.
 - Applied validation and exception handling to maintain data integrity and handle invalid operations.
- E-Commerce Website** June 2025 – July 2025
HTML5, CSS3, JavaScript
 - Developed a responsive premium e-commerce website with interactive UI components and modern product showcase layout.
 - Implemented dynamic product filtering system across multiple categories including fashion, tech, home, and beauty products.
 - Designed and integrated shopping cart functionality with real-time item count, cart drawer, total price calculation, and checkout interface.
 - Built responsive navigation menu, toast notifications, and mobile-friendly user interface using JavaScript and CSS animations.

EXPERIENCE

- Jindal Stainless Ltd. (Hisar)**
Summer Research Intern - Cold Rolling Division (CRD) June 2025
 - Developed monitoring and reporting solutions for industrial automation systems using SCADA platforms, improving real-time fault tracking and operational efficiency.
 - Assisted in designing a multi-zone alarm management system using AP4 control architecture for faster fault isolation and intelligent event handling.
 - Worked on data visualization and system diagnostics for high-voltage equipment, enhancing monitoring accuracy and reducing response time during faults.
 - Applied problem-solving and analytical skills to troubleshoot automation and control systems in a large-scale industrial environment.

MAIN COURSES

- Electrical Engineering:** Electrical Machines, Power Engineering, Control Systems, Power Electronics, Network Analysis & Synthesis, Electromagnetic Field Theory, Measurements & Instrumentation
- Electronics:** Circuit Theory, Analog Electronic Circuits, Digital Electronics, Digital IC Design, Signals & Systems
- Computing:** Data Structures, Machine Learning, AI, Operating Systems, Microprocessors & Interfacing
- Mathematics:** Calculus, Linear Algebra, Probability & Statistics, Numerical Analysis & Transforms

TECHNICAL SKILLS

- Programming Languages:** C, C++, Java, JavaScript, SQL, HTML, CSS
- Web Development:** React.js, Tailwind CSS, REST APIs, Spring Boot, Spring MVC, Microservices, Hibernate ORM (Java), Node.js, Express.js, MongoDB, MySQL, JSP, J2EE, Keycloak
- Core Computer Science:** Data Structures & Algorithms, Operating Systems, Object-Oriented Programming
- Tools & Technologies:** Git, GitHub, Docker, LaTeX, IntelliJ IDEA, VS Code, Cadence Virtuoso (Basics)
- Electrical & Embedded Systems:** BMS, TSAL Circuit Design, MCC & Drive Line Operations, Fire Safety Systems
- Coursework & Interests:** Machine Learning, Artificial Intelligence, Power Electronics, Control Systems

ACHIEVEMENTS & ACTIVITIES

- LeetCode:** Solved 150+ coding problems focusing on Arrays, Linked Lists, and Optimization.
- Aeromodelling Club:** Headed RC aircraft design, testing, and optimization or improved flight performance.
- Certification:** Completed “Data Science & Machine Learning” course at NIT Kurukshetra (Linear Algebra to k-NN).
- Leadership:** Conducted a workshop and served as an event coordinator at Techspardha.
